King crab safari

The original King crab safari

Arctic Adventure Resort is proud to offer the original King Crab Safari. We were the first to offer this exciting product and, after 20 years of regular and frequent diving, we have acquired knowledge about the king crab that few others can match. As a guest on our safari, we want you to have a genuine and close-up experience with the king crab. With our personal approach, we wish to share our knowledge about this loved and infamous crab subject of much mystery and loud debate.

The tour starts in Kirkenes where we pick you up and guide you to our resort at Jarfjorden, 25 km east of Kirkenes. We travel alongside the Russian border and we make a brief stop at the border station at Storskog. On arrival at the resort, our top priority is ensuring our guests are fitted out with warm clothing for the safari. We offer our King Crab Safari year-round. Depending on the season, we use snowmobiles on the fjord ice or a boat on the fjord. Regardless of the method of transportation, you as a guest will be involved in the day's catch. We use both divers and pots to catch the crabs, but the diving is our particular specialty. Finally, the diver emerges out of the darkness with the catch of crabs in his hands. When the crabs are safely on board, it's entirely up to you how close you dare to get.

The trip on the fjord provides the perfect opportunity to watch out for other animals. Fuglefjell (the bird cliff) is one of our summer attractions, while reindeer and white-tailed sea eagles can be spotted year-round. If you're lucky, you will also catch a glimpse of a seal.

On arrival back at the resort, we take the freshly-caught crabs to the kitchen. While they are being prepared, we take the opportunity to tell you all there is to know about these mysterious crabs presented in our multimedia lecture with unique pictures. To conclude, we present the day's highlight: the world's freshest king crabs! The side dishes are

simple – you're here to enjoy the fresh king crabs.

Optional you can also book our product; Bathing in the Barents sea. A unique product where you join the diver into the ice cold sea!
